3	POLICY STATE	5	2	XX	LOCATION STATE for Reinsured/FSA policy, RATE STATE for FCIC policy. **

** From policy which initiated the inquiry when message code is B, N, or S. From retrieved policy data when MESSAGE CODE is D, P, or T.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.
