Application Source:		**File Type:**	Delimited
File Group:		**Reinsurance Year:**	2017
Record Name:	BFR Primary/SBI History	**Version:**	Approved
Record Code:	P95	**Release Date:**	1/31/2017

Record Number	Output	Field Number	Field Name	Data Type	Max Length	Format	BUS Key	Req?	Rules
P95	*	12	BFR History Most Recent List	Character	210			Y	Format for 'BFR History Most Recent List': YYYY,XX,X_XXXX where YYYY = Commodity Year, i.e., '2014'; and XX = AIP Code, i.e., 'CM'; and X_XXXX = History Type. History types are defined with the following: 'A_HIST' – Additional History saved in the P75A; 'P_PRMY' – PASS History as a Primary on another PASS policy; 'P_SBI' – PASS History as an SBI on another PASS policy; 'E_PRMY' – eDAS History as a Primary on an eDAS policy; 'E_SBI' – eDAS History as an SBI on an eDAS policy. Commas separate pieces of history for the same item, and semi-colons separate completely different history items. This history field shows the most recent 6 Commodity Years of history. If there are multiple Additional History items for a single Commodity Year, only one Additional History item will show for that single Commodity Year. If there are multiple PASS/eDAS History items for a single Commodity Year, one distinct item per AIP Code/History Type will show. So, there could be multiple Commodity Year 2013 items with different AIPs and/or History Types. The Exclusions have already been applied to the data, so they will not show in the history.
