P15_Enhanced_APP_III
The Associated Insurance Plan Code, field 46, has been updated to correctly reflect the need for the field to be populated ONLY when SCO and STAX both exist on a cotton policy. When just STAX and ECO exist on a cotton policy the requirement to identify which endorsement will apply to an APH database by SCD is not required. The only requirement is that STAX and ECO cannot exist on the same APH Database when submitting acreage. Therefore, the Associated Insurance Plan Code field should not be used unless both SCO and STAX exist on a cotton policy.
