**INFORMATIONAL MEMORANDUM PM-10-015**

**TO:** All Approved Insurance Providers  
All Risk Management Agency Field Offices  
All Other Interested Parties

**FROM:** Tim B. Witt /s/ *Tim B. Witt*  
Deputy Administrator

**SUBJECT:** Maximum Insurable Prices on the 2011 Nursery Inventory Software and 2011 Eligible Plant List and Plant Price Schedule (EPLPPS) Books

**BACKGROUND:**

The Risk Management Agency (RMA) has identified that the maximum insurable prices contained in the 2011 Nursery Inventory Software and 2011 EPLPPS Books for several container grown plants insured under the Nursery Crop Insurance Program are excessive due to a software error. The 2011 Nursery Inventory Software and 2011 EPLPPS Books were made available to the public prior to the January 31, 2010, contract change date.

Section 4 Contract Changes of the Basic Provisions states: “. . .(b) Any changes in policy provisions, amounts of insurance, premium rates, program dates, and price elections (except as allowed herein or as specified in section 3) can be viewed on the RMA website at <http://www.rma.usda.gov/> or a successor website not later than the contract change date contained in the Crop Provisions. We may only revise this information after the contract change date to correct clear errors (For example, the price election for corn was announced at \$25.00 per bushel instead of \$2.50 per bushel or the final planting date should be May 10 but the final planting date in the Special Provisions states August 10).”

RMA has identified the excessive prices are clearly in error. Attachment A contains a list of the affected container grown plants, their assigned plant types, sizes, and the correct 2011 maximum insurable prices.

Attachment B contains instructions for users who have installed the 2011 Nursery Inventory Software, which was released in January, 2010.

**ACTION:**

Approved prices are those contained in Attachment A. Corrected versions of the 2011 Nursery Inventory Software and 2011 EPLPPS Books will be available on RMA's Web site by close of business today.

The Risk Management Agency Administrators  
And Oversees All Programs Authorized Under  
The Federal Crop Insurance Corporation

An Equal Opportunity Employer

The maximum insurable prices for the container grown plants in the 2011 Nursery Inventory Software and 2011 EPLPPS Books released in January, 2010, will not be accepted for insurance or reinsurance purposes.

**DISPOSAL DATE:**

This memorandum expires May 31, 2011.

## Attachment B

For users who installed the 2011 Nursery Inventory Software released in January, 2010:

- 1) For users who do not grow any of the container grown plants contained in Attachment A, no action is necessary.
- 2) For users who grow any of the container grown plants contained in Attachment A:
  - a) If you have NOT entered any plant inventory lists in the 2011 Nursery Inventory Software, you may safely uninstall that version and then proceed to install the updated “April 2010 Version” Nursery Inventory Software.
  - b) If you have entered any plant inventory lists, please proceed as follows:
    - Open the previous version of the 2011 Nursery Inventory Software, then select and export each plant inventory list you want to save
    - Exit the 2011 Nursery Inventory Software
    - Uninstall using your Windows “Add or Remove Software” procedure
    - Download and install the April 2010 Version, 2011 Nursery Inventory Software
    - Open the application – you should see the “April 2010 Version” displayed in the opening splash screen
    - Import plant inventory lists from above – All “Maximum Insurable Prices” will be corrected, subtotals will be recalculated
    - All plant lines, quantities, catalog prices will exist in new software
    - Reports contain “Version: April 2010” in headers
    - Any Nursery Grower’s Price Endorsements will have to be re-selected due to possible price changes.
