The 2013 CY **volatility factors** shown below are approved for the Revenue Protection and Revenue Protection with Harvest Price Exclusion plans of insurance. The projected prices and volatility factors are covered by the **January 31 sales closing date** and are applicable for the crops, types, practices, and states indicated below:

<b>Crop/Type/Practice/State</b>	<b>Exchange</b>	<b>Contract</b>	<b>Projected Price</b>	<b>Volatility Factor</b>

*\* Section I of the Commodity Exchange Price Provisions (CEPP) stipulates that a trading day must have open interest contract activity on at least 25 contracts to qualify as a “full active trading day”. All trading days during the projected price discovery period for the ICE October cotton contract lack sufficient open interest activity. Accordingly, the most recent eight days of daily settlement prices for the prior (July) contract are used to derive the projected price since there is sufficient open interest activity on all trading days for this contract.*
