*\*See an agent for dates in your county*

### Coverage Levels and Premium Subsidies

Individual amounts of insurance are based on a grower's production history. Each grower's approved average yield is calculated from 4 to 10 years of production records provided to an insurance agent. Producers can select a level of coverage ranging from 50 to 75 percent of their approved average yield and 55 to 100 percent of a price announced by USDA. Catastrophic (CAT) coverage based on 50 percent of their approved yield and 55 percent of the price.

**Price Election** Price used to calculate your premium and indemnity: \$ 5.65 per carton

### Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$300 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent or your local county FSA office for an agent listing

## Loss Example

Example assumes 75-percent coverage, and 100-percent price election of \$5.65 per carton and an average yield of 800 carton per acre and 100-percent share. Based on San Joaquin County rates.

800	Cartons per acre average yield (APH)
<u>x .75</u>	Coverage level percentage
600	Cartons per acre guarantee
<u>- 453</u>	Cartons per acre actually produced
147	Cartons per acre loss
<u>x \$5.65</u>	Price election
<b>\$830.55</b>	<b>Gross indemnity per acre</b>
