Coverage Levels and Premium Subsidies

Crop insurance premiums are subsidized as shown in the table below. For example, if you choose the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Share	33	36	36	41	41	45

Price Elections

A price election is the price you are paid per pound if you have a loss. This is based on the percentage of the established price you chose.

Production Guarantees

Your Production Guarantee is the approved yield per acre multiplied by the coverage level percentage you chose. Yields are based on actual production history (APH) records reported to your insurance agent.

Loss Example

Assume 65-percent coverage level, a 100 percent price election of \$0.91, and an approved APH yield of 4,000 pounds per acre with 0.667 share.

4,000	Pound approved APH yield
x 0.65	Coverage level
2,600	Pound per acre guarantee
x 2	Acres
5,200	Pound unit guarantee
x \$0.91	Price election
\$4,732	Unit guarantee
- \$910	1,000 lbs. production x \$0.91
\$3,822	Unit payment
x 0.667	Share
\$2,549	Final payment
