Projected and Harvest Prices

Projected Price - Based on the Chicago Board of Trade September Futures Contract from August 15, 2014, to September 14, 2014.

Harvest Price - Based on the Chicago Board of Trade September Futures Contract from July 1, 2015, to July 31, 2015. Protects you when fall prices are above the projected price.

Coverage Options

Yield Protection - Only protects against a production loss. The harvest price is not used.

Revenue Protection - Protects against loss of

revenue due to a production loss, change in price, or a combination of both.

Revenue Protection with Harvest Price

Exclusion - Protects against loss of revenue due to a production loss, price decline, or a combination of both.

Area Risk Protection Insurance (ARPI) - Offers three insurance plans based on experience from an area, generally a county, rather than your actual yield.

Catastrophic Coverage (CAT) - Pays 50 percent of your average yield and 55 percent of the projected price.

Replanting and Prevented Planting

Replant Provisions - No replant payment will be made for acreage initially planted to winter wheat.

Late Planting Period - If you choose to plant after the final planting date, the insurance guarantee is reduced by one percent for each day after the final planting date. After 5 days, the guarantee is 60 percent.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date because of an insurable cause.
