

Topeka Regional Office — Topeka, KS

Revised October 2016

Barley

Kansas

Crop Insured

Barley is insurable if:

- It is all non-irrigated and irrigated winter and spring barley grown in the county on insurable acreage;
- Premium rates are provided;
- You have a share; and
- It is planted for harvest as grain under the Common Crop Insurance Policy.

Barley may not be insured if:

- It is interplanted with another crop;
- It is planted as a nurse crop; or
- It follows a cover crop that does not meet the criteria outlined in the insurance availability section of the special provisions.

Counties Available

Both winter and spring barley are insurable in 75 counties throughout Kansas. Coverage in other counties may also be available by written agreement if certain criteria are met. Contact your crop insurance agent or for more information see www.rma.usda.gov/aboutrma/fields/ks_rso/.

Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- A change in the harvest price from the projected price, due to an insured cause of loss (revenue protection plans only);
- Earthquake;
- Failure of the irrigation water supply due to a covered cause of loss during the insurance period;
- Fire;
- Insects, but not damage due to insufficient or improper application of pest control measures;
- Plant disease, but not damage due to insufficient or improper application of disease control measures; or
- Wildlife.

Insurance Period

Insurance coverage begins on the later of:

Date your application is accepted; or

- Date when the barley is planted by the final planting date.

Insurance coverage ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the unit;
- Final adjustment of a loss on the unit;
- Abandonment of the crop; or
- October 31, 2016.

Important Dates

Winter Barley

Sales Closing/Cancellation Date	September 30, 2016
Final Planting Date	Varies by County
Acreage Report Date	November 15, 2016
Premium Billing	August 15, 2017
End of Insurance	October 31, 2017

Spring Barley

Sales Closing/Cancellation Date	March 15, 2017
Final Planting Date	April 30, 2017
Acreage Report Date	July 15, 2017
Premium Billing	August 15, 2017
End of Insurance	October 31, 2017

Reporting Requirements

Acreage Report - You must give a report to your crop insurance agent of all your barley acreage in the county by the acreage reporting date.

Definitions

Actual Production History (APH) Yield - APH yield is used to determine the production guarantee. The APH yield is based on up to 10 years of actual, assigned yields, adjusted, and/or unadjusted transitional yields.

Coverage Levels and Premium Subsidies

Barley may be insured at the coverage levels shown in the table below. Crop insurance premiums are subsidized as shown. The Whole-Farm Unit is not available for the Yield Protection Plan. If you choose the 75-percent coverage level and Enterprise Units, your coverage is 75 percent of your approved actual production history yield, the premium

subsidy is 77 percent, and your premium share is 23 percent of the base premium.

Coverage Level		0.50	0.55	0.60	0.65	0.70	0.75
Subsidy Factors	Enterprise Unit	0.800	0.800	0.800	0.800	0.800	0.770
	Enterprise Unit By practice	0.800	0.800	0.800	0.800	0.800	0.770
	Basic Unit	0.670	0.640	0.640	0.590	0.590	0.550
	Optional unit	0.670	0.640	0.640	0.590	0.590	0.550
	Whole-Farm Unit	0.800	0.800	0.800	0.800	0.800	0.800

For coverage levels above the Catastrophic Risk Protection (CAT) level, in addition to premium costs, administrative fees are \$30 per crop per county.

Catastrophic Coverage

CAT coverage is available at 50 percent of your APH yield and 55 percent of the projected price. The total cost for CAT coverage is an administrative fee of \$300 per crop per county, regardless of the acreage. CAT is available for the Yield Protection Plan only.

Price Elections

Prices are calculated according to the Commodity Exchange Price Provisions. Kansas winter barley prices are based on the July futures market price for corn. The projected price discovery period is August 15 through September 14. The harvest price discovery period is June 1 through June 30. Kansas spring barley prices are based on the July futures market price for corn. The projected price discovery period is February 1 through February 28. The harvest price discovery period is June 1 through June 30. These prices are released no later than 3 business days following the end of the price discovery period. Depending on the insurance plan, these prices are used for compensation per bushel in case of loss. Contact your crop insurance agent, or for more information see <http://prodwebnlb.rma.usda.gov/apps/PriceDiscovery>.

Insurance Units

Basic Unit - A basic unit includes all of your insurable corn acreage in the county by share arrangement.

Premiums are reduced 10 percent for a basic unit.

Optional Unit - If a basic unit consists of two or more sections of land, and certain recordkeeping requirements are met, you may apply for optional units by section. The 10-percent premium discount does not apply.

Enterprise Unit - Generally, all insured crop acreage in a county. Premium discounts apply.

Whole-Farm Unit - Generally, all the insured crops in the county that are covered by the insurance plan. Premium discounts apply. Not available under the Yield Protection Plan.

Insurance Plans

Common Crop Insurance Policy Basic Provisions -

Yield Protection Plan - An insurance plan that only

provides protection against a production loss and is available only for crops for which revenue protection is available.

Revenue Protection Plan - An insurance plan that provides protection against revenue loss due to a production loss, price decline or increase, or a combination of both.

Harvest Price Exclusion - An insurance plan that provides revenue protection, though the use of the harvest price is excluded when determining your revenue protection guarantee. This election is continuous unless canceled by the cancellation date.

Winter Coverage Endorsement

Under this endorsement, the Winter Coverage Option attaches to the Small Grains Barley Crop Provisions and provides coverage for fall seeded barley between the time coverage begins and the spring final planting date. This is available only in counties where both a fall final planting date and spring final planting date are provided. This endorsement is not available with CAT coverage.

Coverage Level by Practice

If you produce a crop on both irrigated and non-irrigated land, you can elect a different coverage level for each production practice. The election is available for additional coverage policies only when the actuarial documents provide separate coverage by irrigated and non-irrigated practices. Even if you have an additional coverage level policy, purchasing the CAT Endorsement is not allowed as one of the separate coverage levels.

Supplemental Coverage Option (SCO)

SCO is a crop insurance option that provides additional coverage for a portion of your underlying crop insurance policy deductible. The amount of SCO coverage depends on the liability, coverage level, and approved yield of your underlying policy. For more information see the SCO fact sheet at www.rma.usda.gov/pubs/rme/ftsht.html.

APH Yield Exclusion

The Yield Exclusion option, when elected, allows you to exclude yields from your actual production history when the actuarial documents provide that the county average yield for that crop year is at least 50 percent below the 10 previous consecutive crop years' average yield. A crop year that has been determined eligible for exclusion in a county will also be eligible for exclusion in contiguous counties. Producers who have either CAT or buy-up insurance policies can use this program. For more information see the APH Yield Exclusion fact sheet at www.rma.usda.gov/pubs/rme/ftsht.html.

Replant Provisions

A replant payment is allowed only if the crop is damaged by a covered cause of loss so the remaining stand will not produce at least 90 percent of your bushel guarantee and it

is practical to replant. The maximum replanting payment will be the lesser of 20 percent of the bushel guarantee, or five bushels times your price election. Replant payments are not available with CAT. This provision is available only in counties where both a fall final planting date and spring final planting date are provided in the special provisions.

Late and Prevented Planting

These provisions provide protection on acreage that is planted after the final planting date or that cannot be planted. The late planting period begins the day after the final planting date for the insured crop and ends 15 days after the final planting date.

Loss Example

Under yield protection a loss occurs when the bushels of barley produced for the unit fall below the production guarantee due to damage from a covered cause of loss. Under revenue protection a loss occurs when the value of production-to-count is less than the revenue protection guarantee due to a production loss and/or a revenue loss. Assume a 40 bushels per acre APH yield, 75-percent coverage level, \$3.47 winter projected price, \$3.57 winter harvest price, and basic unit coverage.

Yield Protection Example

40	APH yield bushels per acre
x 0.75	Coverage level
30	Bushel guarantee
x \$3.47	Projected price
\$104.10	Insurance guarantee
10	Bushels per acre produced
x \$3.47	Projected price
\$34.70	Value of production
\$104.10	Insurance guarantee
- \$34.70	Value of production
\$69.40	Gross indemnity per acre

Revenue Protection Example

40	APH yield bushels per acre
x 0.75	Coverage level
30	Bushel guarantee
x \$3.57	(Higher of projected price or harvest price)
\$107.10	Insurance guarantee
10	Bushels per acre produced
x \$3.57	Harvested price
\$35.70	Value of production

\$107.10	Insurance guarantee
- \$35.70	Value of production
\$71.40	Gross indemnity per acre

The price used to determine value in the revenue protection example above is the higher of the projected price or the harvest price. Figures are shown per acre. Guarantees and losses are paid by unit. See the policy provisions or ask your crop insurance agent for more information.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
