

St. Paul Regional Office — St. Paul, MN

Revised February 2014

Canola

Minnesota

Crop Insured

All canola grown in the county is insurable if:

- Grown in the county on insurable acreage;
- Premium rates are provided;
- You have a share; and
- Planted for harvest as seed.

There is one specialty type for the “Combo” Plans (01) - (03), and you must report your acreage by the specialty type you have planted. The specialty type of canola is Spring High Oleic. If you are not growing the specialty type, your canola will be insured under the Spring Oleic type. Contact a crop insurance agent for more information.

Counties Available

See actuarial documents at <http://prodwebnlb.app.rm.usda.gov/apps/ActuarialInformationBrowser2014/CropCriteria.aspx> for insurable counties. The crop may be insurable in other counties by written agreement if specific criteria are met. Contact an insurance agent for more details.

Causes of Loss

You are protected against the following:

- Adverse weather conditions such as natural perils of hail, frost, freeze, wind, drought, and excess moisture;
- Failure of irrigation water supply, if caused by an insured peril during the insurance period;
- Fire, if due to natural causes;
- Plant disease and insects, but not damage due to insufficient or improper application of pest or disease control measures; or
- Wildlife.

Insurance Period

Insurance coverage begins when the canola is planted, and ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the crop;
- Final adjustment of a loss;
- Abandonment of the crop; or
- October 31, 2014.

Reporting Requirements

Acreage Report - You must give a report of all your canola acreage in the county by the acreage reporting date.

Important Dates

Sales Closing Date	March 15, 2014
Earliest Planting Date	April 16, 2014
Final Planting Date	June 5, 2014
Acreage Reporting Date	July 15, 2014
Premium Billing Date	August 15, 2014
Production Reporting Date	April 29, 2015

Definitions

APH Yield - Actual production history (APH) yield used to determine the production guarantee. The APH yield is based on up to 10 years of actual and/or assigned yields.

Unit - The insurable acreage used to determine the APH yield, the production guarantee, and any indemnity (loss payment).

Production Guarantee - Number of pounds guaranteed per unit. Multiply your APH yield per acre by the coverage level percentage you select by the number of acres in the unit.

Coverage Levels and Premium Subsidies

Canola may be insured at the coverage levels shown in the following table. Crop insurance premiums are subsidized as shown. For example if you select the 75-percent coverage level with an enterprise unit (EU), your coverage is based on 75 percent of your approved APH yield, the premium subsidy is 77 percent, and your premium share is 23 percent of the base premium. Catastrophic Risk Protection (CAT)

coverage is available under the Yield Protection Plan at 50 percent of your APH yield and 55 percent of the projected price. The total cost for CAT coverage is an administrative fee of \$300 per crop per county, regardless of the acreage. Administrative fees, in addition to premium costs, for coverage levels above CAT are \$30 per crop per county.

Item	Unit	Percent								
Cov. Level		50	55	60	65	70	75	80	85	
Subsidy	EU	80	80	80	80	80	77	68	53	
	BU	67	64	64	59	59	55	48	38	
	OU	67	64	64	59	59	55	48	38	
	WU	80	80	80	80	80	80	71	56	

BU - Basic Unit EU - Enterprise Unit
 OU - Optional Unit WU - Whole Farm Unit

Price Elections

Commodity Exchange Price Provisions (CEPP) -

Contains information necessary to derive the **projected price** and the **harvest price** for the insured crop. Information includes the price discovery period, release dates, board of trade(s) utilized, and additional pricing information. Contact your agent or go to the RMA website at www.rma.usda.gov.

Unit Division

Basic Unit (BU) - A basic unit includes all of your insurable canola acreage in the county by share arrangement. Premium discounts apply.

Optional Unit (OU) - If a basic unit consists of two or more sections of land, and certain record keeping requirements are met, you may apply for optional units by section.

Enterprise Unit (EU) - All of the insured crop acreage in a county. Premium discounts apply.

Whole Farm Unit (WU) - All of the insured crops in the county that are covered by the insurance plan. Premium discounts apply. Does not apply to Yield Protection Plan.

Insurance Plan

One policy provides the choice of three plans:

Yield Protection (01) - Production guarantee based on **individual** yield history. Optional, basic, and enterprise units are available.

Revenue Protection (02) - Revenue protection including price protection with optional, basic, enterprise, and whole farm units.

Revenue Protection with Harvest Price Exclusion (03) - Revenue protection with harvest price exclusion with optional, basic, enterprise, and whole farm units.

Trend-Adjusted APH Yield Option

Allows you to increase your APH yield based on your county's historical yield trend. This option is not available under CAT coverage and is available for

only the Spring Oleic type. Only available in select counties.

Replant Provisions

A replanting payment is allowed if your canola crop is damaged by an insurable cause of loss to the extent that most producers producing the crop on similarly situated acreage in the area would not continue to care for the crop, and it is practical to replant. The payment will be the lesser of 20 percent of the production guarantee or 175 pounds, times your projected price, times your share. No replanting payment will be made on acreage initially planted prior to the earliest planting date. Replanting payments are not available with CAT coverage.

Late and Prevented Planting

These provisions provide protection on acreage that is planted after the final planting date or that cannot be planted. Please contact a crop insurance agent for details.

Loss Example

Yield Protection Example - A loss occurs when the pounds of canola produced for the unit fall below the production guarantee as a result of damage from a covered cause of loss. This example assumes a 1,500 pound per acre APH yield, 65-percent coverage level, and basic unit coverage.

1,500	Pounds per acre APH yield
x 0.65	Coverage level
975	Pounds guarantee
- 200	Pounds per acre actually produced
775	Pounds per acre loss
x \$0.210	Projected price (est.-announced in Mar.)
\$162.75	Gross indemnity
- \$17.25	Estimated premium per acre (varies)
\$145.50	Net indemnity

Revenue Protection Example:

975	Pounds (see Yield Protection Example)
x \$0.210	Projected price (est.- announced in Mar.)
\$204.75	Guarantee
200	Pounds per acre actually produced
x \$0.200	Harvest price (est. - announced in Oct.)
\$40.00	Revenue
\$164.75	Gross indemnity (\$204.75 – \$40.00)
- \$18.75	Estimated premium (varies by county)
\$146.00	Net indemnity

Figures shown on a per acre basis; guarantees and losses paid are on a unit basis. See policy provisions.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at: www3.rma.usda.gov/apps/agents/.
