RE: 2007 Reference Year Adjustment Factors for Seed Bean and Pea APHs

Attached are the Reference Year Adjustment Factors (RYAF) for the contract seed dry peas and the contract seed dry beans. This attachment is pertinent to agents, verifiers, and adjustors; please distribute as necessary for your operation.

Refer to the Crop Insurance Handbook Exhibit 27 [FCIC 18010-01 6-06] for specific instructions on APH determinations. **Reminder:** When Transitional yields (T-yields) are needed to complete the four-year minimum APH database or when constructing the Yield Floor value or YA Yield Substitution, T-yields must first be factored to the current year's equivalent. The double asterisk (**) designates which year's RYAF is to be used in adjusting the published 2003 and subsequent years T-yields.

Past yields must also be factored to their 2007 equivalent value. The T-yields contained within the actuarial documents for 2002 and prior years are expressed in 1987-dollar equivalents; use the RYAF designated with the single asterisk (*) to derive the corresponding years' T-yield in its 2007 equivalent value for YA substitution purposes.

We have included years 1985 - 2006. If you require factors for years prior to 1985, or **if you would like next year's memo and factors sent to you via e-mail (so you have an electronic version), please respond with your wishes to the address above, or to Rick.Williams@rma.usda.gov**

NOTE: This document and its attachment can also be accessed from our RO's website at: http://www.rma.usda.gov/aboutrma/fields/wa_rso/

Sincerely,

Dave P. Paul
Director
