The following table contains the elements included in the Cause of Loss Summary of Business files that are available for download via the RMA Public Web Site. The files are created in a pipe (|) delimited format.

The Format column specifies the maximum length and data type for each of the elements. A format of 9 indicates that the value can only be numeric, while a format of X can be alpha-numeric values. Decimal formats will include a V with the number of places to the right of the decimal specified to the left of the V, while the decimal precision is specified to the right of the V (e.g. 9(08)V9(02) would be 00000000.00). An S as the first character in the specification of format, indicates that the value in that element can contain negatives when applicable.
