Types: Medium Grain Type (452) and Short Grain Type (451)

- (1) **Margin projected price** – The margin projected price as determined above, multiplied by a factor determined by RMA, rounded to the nearest one-tenth of a cent. The factor will be available in the Margin Protection Price Discovery reporting application located at www.rma.usda.gov/policies/mp/index.html. The method used for calculating the factor will be available at <http://www.rma.usda.gov/pubs/>. The medium grain type and short grain type margin projected prices and factor will be released no later than three business days following the end of the margin projected price discovery period.
- (2) **Margin harvest price** – The margin harvest price as determined above, multiplied by the same factor determined for the medium grain type and short grain type projected prices, rounded to the nearest one-tenth of a cent. The medium grain type and short grain type harvest prices and factor will be released no later than three business days following the end of the margin harvest price discovery period.

Section III: Input Price Definitions

(1) Projected input price –

- (a) For diesel and interest, the harvest year's average daily settlement price for the projected input price discovery period for the harvest year's futures contract, as shown in the following tables, rounded to the nearest whole cent or the nearest tenth of a percent for the interest rate. Interest will be assessed for a period of six months. The projected input price will be released no later than three business days following the end of the projected input price discovery period.
- (b) For urea and DAP the simple average price measured in US dollars per ton for delivery in New Orleans for the stipulated months published by CME during the time period in the following tables. The projected input price for these inputs will be released on the same date as diesel and interest. The daily projected fertilizer prices are available at <http://www.cmegroup.com/trading/agricultural/fertilizer-swap-futures.html>.
- (c) For potash, the simple average price of the reported average potash price measured in US dollars per ton as reported by the USDA-IL AMS market news during the time period in the following tables. If only one report is available in the period stipulated in these provisions, the report released most proximate to the discovery start date will be used in addition to the report that fell within the period. The report is available at http://www.ams.usda.gov/mnreports/gx_gr210.txt.

(2) Harvest input price –

- (a) For diesel and interest, the harvest year's average daily settlement price for the harvest price discovery period for the harvest year's futures contract, as shown in the following tables, rounded to the nearest whole cent or the nearest tenth of a percent for the interest rate. The harvest input price will be released no later than three business days following the end of the harvest input price discovery period.
- (b) For urea and DAP, the simple average price measured in US dollars per metric ton for delivery in New Orleans for the stipulated months published by CME during the time period in the following tables. The daily prices (as defined above) are available at: <http://www.cmegroup.com/trading/agricultural/fertilizer-swap-futures.html>.

Note that the harvest potash price is the same as the projected potash price. The report is available at http://www.ams.usda.gov/mnreports/gx_gr210.txt.
