<b>RO Determined Yield Type</b>	<b>Applicable Crop</b>	<i>Other Explanation</i>	<b>Special Case Yield Indicator</b>	<b>Rate Yield</b>	<b>YA</b>	<b>Yield Limitation Flag (applies whether RO UG or RO DY)</b>
<b>Irrigation Supply is not adequate</b>	Category C		I	Equal Approved Yield	No	11
<b>Productivity is Reduced</b>	Category C		R	Equal Approved Yield	No	11
<b>Productivity is Reduced (Gross Sales Below Approved Average Revenue/Acre &amp; Removed and/or damaged Acreage)</b>	Pecan Revenue		PS	Equal Approved Yield	No	11

**RO Determined Yield Type, Yield Limitation Flag and Rate Yield Chart (Continued)**

Not RO Determined Yields but Special Case Yield Indicators						
High Variability Yield Adjustment (AB/DT)	Category C	<i>Alternate Bearing</i>	AF (AIP adjusted per CIH)	Equal Approved Yield	No	11
	Category C	<i>Downward Trending</i>	DF (AIP adjusted per CIH)	Equal Approved Yield	No	11
	Category C	<i>Downward Trending &amp; Alternate Bearing</i>	F (AIP Adjusted by Formula in RO UG)	<b>Dependent upon authorization</b>	<b>No, unless specified by the RO UG.</b>	<ul style="list-style-type: none"> <li>• If Approved Yield Increased and no YA then YLF = 01;</li> <li>• If Approved Yield Increased &amp; YA = 09 or YLF 12 (surcharge applies if the crop is contained in chart below);</li> <li>• If Approved Yield Decreased &amp; YA applies = 11 or YLF 13 (surcharge applies if crop is contained in chart below);</li> </ul> If Approved Yield Decreased and no YA then YLF = 11
	Category C	<i>Downward Trending &amp; Alternate Bearing</i>	D (Met AB or DT CIH test, but waived modification by CIH formula and adjusted by RO UG)		<b>No, unless specified by the RO UG.</b>	<ul style="list-style-type: none"> <li>• If Approved Yield Increased and no YA then YLF = 01;</li> <li>• If Approved Yield Increased &amp; YA = 09 or YLF 12 (surcharge applies if the crop is contained in chart below);</li> <li>• If Approved Yield Decreased &amp; YA applies = 11 or YLF 13 (surcharge applies if crop is contained in chart below);</li> </ul> If Approved Yield Decreased and no YA then YLF = 11

<p><b>Average Yield:</b> The yield, calculated by totaling the yearly actual yields; assigned yields due to: failure to provide production report, excessive yields, and second crop planted without double crop history on prevented planted acreage, and, adjusted or unadjusted T-Yields and dividing the total by the number of yields contained in the database.</p>
<p><b>Approved Yield:</b> The yield determined by the Regional Office, according to their procedures, based upon documentation submitted by the producer through the AIP, used to determine the guarantee.</p>
<p><b>Yield Descriptor:</b> The applicable yield descriptor as provided in CIH Exhibit 15W. or a "F" yield descriptor IF provided by the Regional Office through RO DY or through RO UG.</p>
<p><b>Yield Indicator:</b> Yield Indicators for yields authorized through RO UG, are the applicable Yield Indicators found in CIH Exhibit 15V (including applicable special case indicators).</p>
<p><b>YE, Cups &amp; Floors:</b> Are not authorized for RO DY request or Underwriting Guidelines.</p>
<p>If YA is applied by the RO through the determined yield or through Underwriting Guidelines then the AIP must send the YA option code on the acreage record through PASS. If YA was elected on a non-contiguous rated crop, then the surcharge flag on the acreage record must also be set to establish the .05 multiplicative rate. The yield record will not include the YA option codes.</p>
