SUMMARY OF CHANGES FOR THE COARSE GRAINS CROP PROVISIONS (98-041)

The following is a brief description of changes to the crop provisions that will be effective for the 1998 crop year. Please refer to the crop provisions for more complete information.

- The crop provisions have been modified to accommodate changes made to the Basic Provisions of the Common Crop Insurance Policy. These modifications may include, but are not limited to:
  
  (a) Removal of some definitions now contained in the Basic Provisions;

  (b) Removal of unit division provisions since provisions previously contained in section 2 regarding unit division requirements and unit structure by section, section equivalent, FSA farm serial number, and irrigated and non-irrigated practices, have been moved from the crop provisions to the Basic Provisions; and

  (c) Modification of late and prevented planting provisions.
1. Definitions
Coarse grains – Corn, grain sorghum, and soybeans.
Grain sorghum – The crop defined as sorghum under the United States Grain Standards Act.
Harvest – Combining, threshing, or picking the insured crop for grain, or cutting for hay, silage, or fodder.
Local market price – The cash grain price per bushel for the U.S. No. 2 yellow corn, U.S. No. 2 grain sorghum, or U.S. No. 1 soybeans, offered by buyers in the area in which you normally market the insured crop. The local market price will reflect the maximum limits of quality deficiencies allowable for the U.S. No. 2 grade for yellow corn and grain sorghum, or U.S. No. 1 grade for soybeans. Factors not associated with grading under the Official United States Standards for Grain, including but not limited to protein and oil, will not be considered.
Planted acreage – In addition to the definition contained in the Basic Provisions, coarse grains must initially be planted in rows (corn must be planted in rows far enough apart to permit mechanical cultivation), unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.
Production guarantee (per acre) – In lieu of the definition contained in the Basic Provisions, the number of bushels (tons for corn insured as silage) determined by multiplying the approved actual production history (APH) yield per acre, calculated in accordance with 7 CFR part 400, subpart G, by the coverage level percentage you elect.
Silage – A product that results from severing the plant from the land and chopping it for the purpose of livestock feed.

2. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities
(a) In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions, you may select:
   (1) For grain sorghum and soybeans, only one price election for each crop in the county insured under this policy; and
   (2) For corn, only one price election for all the corn in the county insured as grain under this policy, and only one price election for all the corn in the county insured as silage under this policy. The price elections you choose for grain and silage must have the same percentage relationship to the maximum price election offered by us for grain and silage. For example, if you choose one hundred percent (100%) of the maximum grain price election and you also insure corn on a silage basis, you must choose one hundred percent (100%) of the maximum silage price election.
(b) For corn only, if you harvest the crop in a manner other than the manner you reported (for example, you reported grain but harvested as silage) and you did not select a price election for the type harvested, we will assign a price election for the type harvested that bears the same percentage relationship to the maximum price election you selected for the type reported (for example, if you selected a grain price election in the amount of eighty percent (80%) of the maximum price election for grain and you did not select a silage price election, we will assign a silage price election in the amount of eighty percent (80%) of the maximum price election for silage specified in the Special Provisions if you harvest for silage). This assigned price election will be used only to determine the dollar value of production to count for indemnity purposes and will not be used to determine the amount of insurance or premium.

3. Contract Changes
The contract change date is November 30 preceding the cancellation date (see the provisions of section 4 (Contract Changes) of the Basic Provisions).

4. Cancellation and Termination Dates
In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are:

<table>
<thead>
<tr>
<th>State and County</th>
<th>Cancellation and Termination Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) For corn and grain sorghum:</td>
<td></td>
</tr>
<tr>
<td>Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof</td>
<td>January 15</td>
</tr>
<tr>
<td>El Paso, Hudspeth, Culberson, Reeves, Loving, Winkler, Ector, Upton, Reagan, Sterling, Coke, Tom Green, Concho, McCulloch, San Saba, Mills, Hamilton, Bosque, Johnson, Tarrant, Wise, Cooke Counties, Texas, and all Texas counties lying south and east thereof to and including Terrell, Crockett, Sutton, Kimble, Gillespie, Blanco, Comal, Guadalupe, Gonzales, De Witt, Lavaca, Colorado, Wharton, and Matagorda Counties, Texas</td>
<td>February 15</td>
</tr>
<tr>
<td>Alabama; Arizona; Arkansas; California; Florida; Georgia; Louisiana; Mississippi; Nevada; North Carolina; and South Carolina</td>
<td>February 28</td>

</table>
5. Insured Crop

(a) In accordance with section 8 (Insured Crop) of the Basic Provisions, the crop insured will be each coarse grain crop you elect to insure for which premium rates are provided by the actuarial documents:

(1) In which you have a share;
(2) That is adapted to the area based on days to maturity and is compatible with agronomic and weather conditions in the area; and
(3) That is not (unless allowed by the Special Provisions or by written agreement):
   (i) Interspersed with another crop except as allowed in paragraph 5(b)(1); or
   (ii) Planted into an established grass or legume.

(b) For corn only, in addition to the provisions of subsection 5(a), the corn crop insured will be all corn that is:

(1) Plant ed for harvest either as grain or as silage (see subsection 5(c)). A mixture of corn and sorghum (grain or forage–type) will be insured as silage if the sorghum does not constitute more than twenty percent (20%) of the plants;
(2) Yellow dent or white corn, including mixed-yellow and white, waxy or high–lysine corn, and excluding:
   (i) High–amylose, high–oil, high–protein, flint, flour, Indian, or blue corn, or a variety genetically adapted to provide forage for wildlife or any other open pollinated corn, unless a written agreement allows insurance of such excluded crops.
   (ii) A variety of corn adapted for silage use only when the corn is reported for insurance as grain.

(c) For corn only, if the actuarial documents for the county provide a premium rate for:

(1) Both grain and silage, all insurable acreage will be insured as the type or types reported by you on or before the acreage reporting date;
(2) Grain but not silage, all insurable acreage will be insured as grain unless a written agreement allows insurance on all or a portion of the insurable acreage as silage; or
(3) Silage but not grain, all insurable corn acreage will be insured as silage unless a written agreement allows insurance on all or a portion of the insurable acreage as grain.

(d) For grain sorghum only, in addition to the provisions of subsection 5(a), the grain sorghum crop insured will be all of the grain sorghum in the county:

(1) That is planted for harvest as grain;
(2) That is a combine–type hybrid grain sorghum (grown from hybrid seed); and
(3) That is not a dual–purpose type of grain sorghum (a type used for both grain and forage), unless a written agreement allows insurance of such grain sorghum.

(e) For soybeans only, in addition to the provisions of subsection 5(a), the soybean crop insured will be all of the soybeans in the county that are planted for harvest as beans.

6. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions, any acreage of the insured crop damaged before the final planting date, to the extent that a majority of producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.

7. Insurance Period

In accordance with the provisions under section 11 (Insurance Period) of the Basic Provisions, the calendar date for the end of the insurance period is the date immediately following planting as follows:

(a) For corn insured as grain:
   (1) Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof
   (2) Clark, Cow, Grays Harbor, Island, Jefferson, King, Kitsap, Lewis, Pierce, Skagit, Snohomish, Thurston, Wahkiakum, and Whatcom Counties, Washington
   (3) All other counties and states

(b) For corn insured as silage:
   All states

(c) For grain sorghum:
   (1) Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof
   (2) All other Texas counties and all other states

(d) For soybeans:
   All states

8. Causes of Loss

In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions, insurance is provided only against the following causes of loss which occur within the insurance period:

(a) Adverse weather conditions;
(b) Fire;
(c) Insects, but not damage due to insufficient or improper application of pest control measures;
(d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(e) Wildlife;
(f) Earthquake;
(g) Volcanic eruption; or
(h) Failure of the irrigation water supply, if applicable, due to an unavoidable cause of loss occurring within the insurance period.

9. Replanting Payments

(a) In accordance with section 13 of the Basic Provisions, replanting payments for coarse grains are allowed if the coarse grains are damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage and it is practical to replant.

(b) The maximum amount of the replanting payment per acre will be the lesser of twenty percent (20%) of the production guarantee or the number of bushels (tons for corn insured as silage) set out herein, multiplied by your price election multiplied by your insured share or the share determined under 9(c), if applicable. The number of bushels or tons are 8 bushels for corn grain; 1 ton for corn silage; 7 bushels for grain sorghum; and 3 bushels for
(c) When more than one person insures the same crop on a share basis, a replanting payment based on the total shares insured by us may be made to the insured person who incurs the total cost of replanting. Payment will be made in this manner only if an agreement exists between the insured persons which:
(1) Requires one person to incur the entire cost of replanting; or
(2) Gives the right to all replanting payments to one person.

(d) When the insured crop is replanted using a practice that is uninsurable as an original planting, the liability for the unit will be reduced by the amount of the replanting payment which is attributable to your share. The premium amount will not be reduced.

10. Duties in the Event of Damage or Loss
(a) In accordance with the requirements of section 14 (Duties in the Event of Damage or Loss) of the Basic Provisions, if you initially discover damage to any insured crop within 15 days of or during harvest, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in the unit, and must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

(b) For any corn unit that has separate dates for the end of the insurance period (grain and silage):
(1) In lieu of paragraph 14(a)(2) of the Basic Provisions, if damage occurs:
   (i) Before the earliest end of insurance period date (grain or silage), you must give us notice within 72 hours of your initial discovery of damage (but not later than 15 days after that earliest end of insurance period date); or
   (ii) If damage does not occur before the earliest end of insurance period date (grain or silage), but occurs before the latest end of insurance period date (grain or silage), you must give notice within 72 hours of your initial discovery of damage (but not later than 15 days after that latest end of insurance period date).

(2) In lieu of subsection 14(c) of the Basic Provisions, in addition to complying with all other notice requirements, you must submit a claim for indemnity declaring the amount of your loss not later than 60 days after the latest date for the end of insurance period for the unit. This claim must include all the information we require to settle the claim.

11. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production:
(1) For any optional unit, we will combine all optional units for which acceptable records of production were not provided; or
(2) For any basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.

(b) In the event of loss or damage covered by this policy, we will settle your claim on any unit:
(1) For grain sorghum and soybeans by:
   (i) Multiplying the insured acreage by the production guarantee;
   (ii) Subtracting from this the total production to count;
   (iii) Multiplying the remainder by your price election; and
   (iv) Multiplying this result by your share.

(2) For corn by:
   (i) Multiplying the insured acreage of each type (grain/silage) by the production guarantee for the applicable type;
   (ii) Multiplying each result by the price election for the applicable type;
   (iii) Adding these dollar values;
   (iv) Multiplying the production to count of each type (see subsection 11(d)) by the price election for that type (see the provisions under section 2 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities));
   (v) Subtracting the result of step (v) from the result of step (iii); and
   (vi) Multiplying this result by your share.

(c) The total production in bushels (tons for corn silage) in locations acceptable to us will include:
(1) All appraised production as follows:
   (i) Not less than the production guarantee for acreage:
      (A) That is abandoned;
      (B) Put to another use without our consent;
      (C) Damaged solely by uninsured causes; or
      (D) For which you fail to provide records of production that are acceptable to us;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with subsection 11(e)); and
   (iv) Potential production on insured acreage you want to put to another use or you wish to abandon and no longer care for, if you and we agree on the appraised amount of production. Upon such agreement the insurance period for that acreage will end if you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
      (A) If you do not elect to continue to care for the crop we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us. (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be
used to determine the amount of production to count.

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

(2) All harvested production from the insurable acreage.

(d) The production to count for corn will be in bushels for grain and in tons for silage as follows:

(1) For harvested acreage, according to the method of harvest; and

(2) For unharvested acreage, according to the information contained on your acreage report; except as otherwise provided in paragraph 11(c)(1).

(e) Mature coarse grain production (excluding corn insured or harvested as silage) may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable it will be made prior to any adjustment for quality. Corn insured or harvested as silage will be adjusted for excess moisture and quality only as specified in subsection 11(f).

(1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of:

(i) Fifteen percent (15%) for corn (If moisture exceeds 30 percent (30%), production will be reduced 0.2 percent for each 0.1 percentage point above 30 percent (30%));

(ii) Fourteen percent (14%) for grain sorghum;

(iii) Thirteen percent (13%) for soybeans.

We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if:

(i) Deficiencies in quality, in accordance with the Official United States Standards for Grain, result in:

(A) Corn not meeting the grade requirements for U.S. No. 4 (grades U.S. No. 5 or worse) because of test weight or kernel damage (excluding heat damage) or having a musty, sour, or commercially objectionable foreign odor;

(B) Grain sorghum not meeting the grade requirements for U.S. No. 4 (grades U.S. Sample grade) because of test weight or kernel damage (excluding heat damage) or having a musty, sour, or commercially objectionable foreign odor (except smut odor), or meets the special grade requirements for smutty grain sorghum;

(C) Soybeans not meeting the grade requirements for U.S. No. 4 (grades U.S. Sample grade) because of test weight or kernel damage (excluding heat damage) or having a musty, sour, or commercially objectionable foreign odor (except garlic odor), or which meet the special grade requirements for garlicky soybeans;

(ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions;

(ii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us; and

(iii) The samples are analyzed by a grader licensed under the authority of the United States Grain Standards Act or the United States Warehouse Act with regard to deficiencies in quality, or by a laboratory approved by us with regard to substances or conditions injurious to human or animal health. (Test weight for quality adjustment purposes may be determined by our loss adjuster).

(4) Coarse grain production that is eligible for quality adjustment, as specified in paragraphs 11(e)(2) and (3), will be reduced by the quality adjustment factor contained in the Special Provisions.

(f) For corn insured or harvested as silage:

(1) Whenever our appraisal of grain content is less than 4.5 bushels of grain per ton of silage, the silage production will be reduced by 1 percentage point for each 0.1 (1/10) of a bushel less than 4.5 bushels per ton. (If we cannot make a grain appraisal before harvest and you do not leave a representative unharvested sample, in accordance with the policy no reduction for grain–deficient silage will be made.); and

(2) If the normal silage harvesting period has ended, or for any acreage harvested as silage or appraised as silage after September 30 of the crop year, we may increase the silage production to count to 65 percent (65%) moisture equivalent to reflect the normal moisture content of silage harvested during the normal silage harvesting period.

(g) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

12. Prevented Planting

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.
