Coverage Options

Yield Protection (YP) - Only protects against a production loss.

Revenue Protection (RP) - Protects against loss of revenue due to a production loss, change in price or a combination of both.

Revenue Protection with Harvest Price Exclusion (RPHPE) - Protects against loss of revenue due to a production loss, price decline or a combination of both.

Area Risk Protection Insurance (ARPI) - Offers three insurance plans based on experience from an area, generally a county, rather than your actual yield. Replaces GRP/GRIP.

Catastrophic Coverage (CAT) - Pays 50 percent of your average yield and 55 percent of the projected price. CAT has no premium but does have a \$300 administrative fee per crop per county.

Margin Protection (MP) - An area based plan that protects against an unexpected decrease in operating margin. Can be purchased by itself or in conjunction with YP or RP plans with the same Insurance Company. Sales Closing Date for MP is September 30.

Replanting

Replant Provisions - You may receive a replant payment if:

- It is practical to replant;
- The appraisal does not exceed 90 percent of your guarantee; and
- You replant at least 20 acres or 20 percent of the unit.

It will be considered practical to replant within or prior to the late planting period unless the insurance company determines otherwise.

Replant payments are not available on CAT or ARPI policies.

Late Planting Period - If you choose to plant after the final planting date, your insurance guarantee is reduced by one percent for each day after the final planting date. After 25 days, your guarantee is 60 percent.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date because of an insurable cause. Prevented planting is not available for all plans of insurance. See a crop insurance agent for details.
