
RMA also reminds Idaho, Oregon, and Washington fruit producers that the final date to apply for crop insurance coverage for the 2020 crop year is November 20. This date applies to crop insurance policies for apple, blueberry, cranberry, grape, pear, stonefruit crops (apricots, nectarines, freestone peaches, and plums/prunes), sweet and tart cherry (actual revenue history), and table grapes. Current policyholders who wish to make changes to their existing coverage also have until the November 20 sales closing date to do so.

Individual yield crop insurance policies provide protection against production losses due to natural perils. The Actual Revenue History and WFRP policies provide revenue protection.

Producers are encouraged to visit their crop insurance agent soon to learn specific details for 2020 crop year. Crop insurance is sold and delivered solely through private crop insurance agents. A list of crop insurance agents is available at all USDA Service Centers and online at the RMA Agent Locator. Growers can use the RMA Cost Estimator to get a premium amount estimate of their insurance needs online.
