## Crop Insurance Reminders for Farmers Affected by Recent Weather Events

SAINT PAUL, Minn., August 13, 2020 — The recent storm system on August 10 resulted in significant damage to crops across the Midwest, including in Illinois, Iowa, Indiana, Michigan and Wisconsin.

USDA's Risk Management Agency (RMA) offers a few basic reminders for producers in these affected areas with crop insurance:

- If you have a crop loss, or think you may have a crop loss, notify your crop insurance agent within 72 hours of the of the initial time of discovery of damage or loss of production. This must be done to begin the claim process, and before destroying the insured crop, putting the insured crop to an alternative use, or abandoning any portion of the insured crop.
- Your Approved Insurance Provider (AIP) will discuss your options and, if necessary, send a loss adjuster to work the claim.
- Keep in mind, damaged crops taken to harvest must be cared for and maintained following generally recognized good farming practices.
- If you decide not to maintain the entire crop, your AIP will work with you to identify representative sample areas or strips that must be left intact and maintained for future appraisals.

For more information, please see our [August 10 Derecho FAQs](#).

Please talk with your crop insurance agent and AIP to explore the available options when your crops are damaged by a natural disaster.

RMA is authorizing additional flexibilities due to coronavirus while continuing to support producers, working through AIPs to deliver services, including processing policies, claims and agreements. RMA staff are working with AIPs and other customers by phone, mail, and electronically to continue supporting crop insurance coverage for producers. Farmers with crop insurance questions or needs should continue to contact their crop insurance agents about conducting business remotely (by telephone or email). More information can be found at [farmers.gov/coronavirus](https://farmers.gov/coronavirus).
