Coverage Levels and Premium Subsidies

Individual amounts of insurance are based on your production history. Your approved average yield is calculated from 4 to 10 years of production records provided to an insurance agent. Coverage levels range from 50 to 85 percent of your approved yield. Crop insurance premiums are subsidized as shown in the following table. For example, if you choose the 65-percent coverage level, your premium share would be 41 percent of the base premium.

Item	Percent							
	50	55	60	65	70	75	80	85
Coverage Level	50	55	60	65	70	75	80	85
Premium Subsidy	67	64	64	59	59	55	48	38
Your Premium Share	33	36	36	41	41	45	52	62

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium cost to you. There is, however, an administrative fee of \$300 per crop per county, regardless of the acreage.

Price Election

The price used to calculate your premium and indemnity. Contact a crop insurance agent for current information.

Loss Example

400	Cwt. per acre average yield
x 0.75	Coverage level percentage
<u>300</u>	Cwt. per acre guarantee
- 250	Cwt. per acre actually produced
<u>50</u>	Cwt. per acre loss
x \$14.85	Price election
\$ 742.50	Gross indemnity per acre

Price used above is for example only. Contact a crop insurance agent for current information.
