## POLICY

“POLICY” is the title of this section. It identifies the opening and closing of this xml section. This document provides additional reporting requirements of data under this section.

**Entity precedes Policy.**

The process flag and/or change flag submitted for this section will be inherited unless otherwise indicated. Example: `<POLICY process flag = “2”>`.

**For DAS and eDAS, only one producer/entity nationwide per key**

(Approved Insurance Provider (field 1), Location State (field 3), Policy Number (field 5), Reinsurance Year (field 8)).

### CHANGE_FLAG (ATTRIBUTE)

If Process Flag = 2 or 5 certain data will be allowed to change after initial acceptance. Tags have been identified by flags below. Flag of ‘1’ will only be allowed to change data identified by ‘1’. Flag of ‘2’ will be allowed to change data identified by ‘1 or 2’. Flag of ‘3’ will be allowed to change any data.

Valid flags:

- 1 = general
- 2 = company approval
- 3 = RMA approval

Change flag will default to 2 unless otherwise indicated.

### PROCESS_FLAG (ATTRIBUTE)

Valid flags:

- 1 = original
- 2 = modify
- 3 = delete
- 4 = validate (original)
- 5 = validate (modify)
- 6 = quote (only applicable for premium)
- 7 = retrieve
- 8 = cancel (only applicable for Livestock crop policy)
- 9 = re-instate (only applicable for Livestock crop policy)

Process flag will default to 1 unless otherwise indicated.

</table>

Notes: Key fields are: Approved Insurance Provider (field 1), Location State (field 3), Policy Number (field 5), Reinsurance Year (field 8)

Key fields with Level of Change = 3 will be allowed with RMA approval. When a company submits this information, eDAS will change all other associated data to the new information.

Key fields with Level of Change = 2 requiring a change to that field, company will use an administrative screen to identify this change. eDAS will use this information to verify the data when submitted.

* Data elements that must be accepted to meet timely reporting of an eligible crop insurance contract for AGR/AGR-L.

#### Appendix IV Review Flag

If the AIP reviews the record once, use values from referenced field (field 10). For a subsequent review of the same record they would use a combo number such as ‘17’ for a program review followed by a $500,000 claim review.

Information regarding column headers:

1) ‘Tag’ identifies the naming convention used in creation of XML.
2) ‘Key’ identifies the tags that are key to the validation/storage of data.
3) ‘Level of Change’ identifies the data that is allowed to change and at what level according to Change Flag.
4) ‘IN/OUT’ identifies the direction of data, IN for input and OUT for output with flags ‘N’ (NO) and ‘Y’ (YES).
5) ‘REQ/OPT/CON’ identifies if the data is required (REQ), optional (OPT), or conditional (CON). If optional or conditional and there is no data to report the tag is not used.
6) ‘Max Size’ is the maximum size of data allowed for that tag.
7) ‘Picture’ identifies the type of data expected.
8) ‘Description/Edit’ gives additional information.

On an update, only the key fields that define the sections are required plus any changed fields or new sections.
