For all Commodities, if Annual Yield is less than Adjusted Yield then add Adjusted Yield to accumulated Adjusted Yield; otherwise add Annual Yield to accumulated Adjusted Yield.

For Grass Seed, "0102", Sesame, "0396", and Camelina, "0333", 2015 Annual Yield is one Annual Yield in accumulated Adjusted Yield, otherwise annual and Annual Yield to accumulated Adjusted Yield.

For Olives, "0501" valid for years 2+.

For Camelina, "0333" valid for years 2+.

Only valid for commodities that have Trend Adjusted APH elected. Approved Yield must be equal to trended approved.

Only valid for commodities that have Yield Exclusion Only or Yield Exclusion with Trend Adjusted APH elected.

If an APH database has actual yields in eligible crop years exceeding the trend adjusted APH elected in the APH database, then adjustments may apply. The APH elector in the APH database must use the YE option code and the crop year limitation flag of 15 or equal to approved yield.

Actual yields in an APH database identified with the following yield descriptors are eligible for exclusion in an eligible crop year identified in the actuarial documents—A, AG, B, CL, DA, DL, DG, DH, DJ, DK, DL, GN, GY, NA, NG, NO, NR, NU, NV, NW, OY, PA, PG, PR, PV, PW, R, RY, UY, V, VW, VY, and WY.

Rate Yield must equal Average Yield on the Yield Limitation Code.

Rate Yield must equal Average Yield on the Yield Limitation Code.
