Description/Edit
"SBI" is the title of this section and identifies the opening and closing of this xml section. This document provides additional reporting requirements of data under this section.
Entity precedes SBI.
This section will inherit the process flag and/or change flag of the Entity unless set by this section. Example: <sbi flag="2" process="">.</sbi>
Transfer of Right to an Indemnity ID Number will be validated against the SSA file and ITS database.
If Process Flag = 2 or 5 certain data will be allowed to change after initial acceptance. Tags have been identified by flags below. Flag of '1' will only be allowed to change data identified by '1'. Flag of '2' will be allowed to change data identified by '1 or 2'. Flag of '3' will be allowed to change any data. Valid flags:  1 = general 2 = company approval 3 = RMA approval
Change flag will default to 2 unless otherwise indicated.
Valid flags:  1 = original  2 = modify  3 = delete  4 = validate (original)  5 = validate (modify)  6 = (only applicable for premium)  7 = retrieve  8 = cancel (only applicable for Livestock crop policy)  9 = re-instate (only applicable for Livestock crop policy)  Process flag will default to 1 unless otherwise indicated.

Notes: Key field is Record Number (field 1).

If Entity Type (field 4) = 'I' and Id Type (field 2) = '2' for the entity then there must be 1 SBI record.

If Entity Type (field 4) = 'S' and Id Type (field 2) = '2' for an the entity then there must be 2 SBI records.

Non-Citizen SSN Reporting:

Format/Edits

No.	Tag	Key	Level of	IN/	REQ/	Max	Picture	Description/Edit
			Change	OUT	OPT/ CON	Size		

MGR-05-008 does not apply to the current products that are processed by eDAS. The following information still applies.

In accordance with the Federal Crop Insurance Act and the Common Crop Insurance Policy Basic Provisions, the submission of a Social Security Number (SSN) or Employer Identification Number (EIN) is required to participate in the multiple peril crop insurance program or Livestock Insurance Program. Additionally, the Standard Reinsurance Agreement and Livestock Price Reinsurance Agreement definitions provide that an eligible crop insurance contract is for an eligible producer who possesses an EIN or SSN. If the non-citizen cannot provide a SSN, even if it is due to not being eligible for a SSN, the amount of coverage for all crops included on the application must be reduced proportionately by the percentage interest in the insured of such persons in accordance with Section 2(b)(2(i) of the Basic Provisions.

Consistent with current policy provisions and the Act, RMA's systems require a SSN for all individuals, including non-citizens, receiving benefits through the crop insurance program either as a policyholder or as a person with substantial beneficial interest in a policyholder. Securing of a SSN will be the sole responsibility of those individuals needing such and RMA will not provide a letter or other recommendations on behalf of the individual to obtain such. They must meet all requirements of the Social Security Administration under their current operating procedures.

#### Information regarding column headers:

- 1) 'Tag' identifies the naming convention used in creation of XML.
- 2) 'Key' identifies the tags that are key to the validation/storage of data.
- 3) 'Level of Change' identifies the data that is allowed to change and at what level according to Change Flag.
- 4) 'IN/OUT' identifies the direction of data, IN for input and OUT for output with flags 'N' (NO) and 'Y' (YES).
- 5) 'REQ/OPT/CON' identifies if the data is required (REQ), optional (OPT), or conditional (CON). If optional or conditional and there is no data to report the tag is not used.
- 6) 'Max Size' is the maximum size of data allowed for that tag.
- 7) 'Picture' identifies the type of data expected.
- 8) 'Description/Edit' gives additional information.

On an update, only the key fields that define the sections are required plus any changed fields or new sections.
