Latest revision to the T81 PHT record layout for RY 2022. This version includes the record type 81 with the Type 58 record included in years 2009 - 2010.

Exhibit P11 – Acreage

It was found that the rules for field 84 needs to be updated. The rule description should state:

This value will be used to determine the HIPWI Acre Limitation when a hurricane lands:

Initial Year:

Loss triggered for the county before acreage is reported the lesser of:

1) Number of acres specified on intended acreage report submitted by SCD or number of acres submitted within 10 days of date land was acquired

Subsequent Year:

1) Loss is triggered for the county before acreage is reported, the actual acres planted but limited to our determination of the lesser of:

i) Number of acres planted at the time of the occurrence of the triggering event and reported on the acreage report for the current year

ii) The highest number of planted insurable acres in any one of the immediate past four crop years.

"Only submit when Insurance Plan Code is '37'. Only submitted when the applicable landing date of a hurricane requires a reduction in covered acres for the commodity.

Submission of acres in this field will trigger PASS to calculate the HIPWI Acre Limitation and reduce coverage.

This is the gross acres for the commodity in the county, will be the same for each P11. "

Exhibit P14 – Insurance In Force

Modified Insured Commodity Signature (with separate rule for plan 90), modified Coverage Level Percent. This update is to fix previous edit that was accidentally removed from document.
