Causes of Loss

You are protected against the following:

- Adverse weather conditions including natural perils such as hail, frost, freeze, wind, drought, and excess moisture;
- Earthquake;
- Failure of the irrigation water supply if caused by an insured cause of loss;
- Drought or the intrusion of saline water;
- Fire, if caused by an insured peril during the insurance period;
- Insects, but not damage due to insufficient or improper application of control measures;
- Plant disease, but not damage due to insufficient or improper application of control measures;
- Volcanic Eruption; or
- Wildlife.

Insurance Period

Coverage usually begins when the crop is planted and ends at the earliest occurrences of one of the following:

- Total destruction of the crop;
- Harvest of the crop;
- Final adjustment of a loss;
- Abandonment of the crop; or
- October 31, 2016.

Insurance Plans

Common Crop Insurance Policy Basic Provisions

Yield Protection - A plan of insurance that only provides protection against a production loss and is available only for crops for which revenue protection is available.

Revenue Protection - A plan of insurance that provides protection against loss of revenue due to a production loss, price decline or increase, or a combination of both.

Revenue Protection with Harvest Price Exclusion - If the harvest price exclusion is elected, the insurance coverage provides protection only against loss of revenue due to a production loss, price decline, or a combination of both.

Area Risk Protection Insurance - Provides protection against widespread loss of revenue or widespread loss of yield in a county.

Downed Rice Endorsement

This endorsement may be applicable if:

- The Basic Provisions and the Rice Crop Provisions are in force;
- This endorsement is elected on or before the sales closing date;
- Applies to all eligible acreage of rice insurable under the Rice Crop Provisions;
- You are the only person responsible for all costs associated with harvesting the downed rice.

Replant Provisions

A replanting payment is allowed if your rice crop is damaged by a covered cause of loss to the extent that the remaining stand will not produce at least 90 percent of your bushel guarantee and it is practical to replant. The maximum payment will be the lesser of 20 percent of the production guarantee or 400 pounds multiplied by the projected price, multiplied by your insured share. Replant is not available under catastrophic coverage.

x \$0.1270	Projected price
\$23,812.50	Insurance guarantee
150,000	Pound production
x \$0.1270	Harvest price
\$19,050.00	Value of production
\$23,812.50	Insurance guarantee
<u>-\$19,050.00</u>	Value of production
\$4,763.00	Indemnity payment

Late and Prevented Planting Provisions

The late planting period begins the day after the final planting date for the insured crop and ends 15 days after the final planting date. For insured crop acreage planted during the late planting period, the production guarantee for each acre will be reduced for each day planted after the final planting date by 1 percent for the first through the 15th day.

Your prevented planting coverage is 45 percent of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

Loss Example

Assume a 100-percent share in 50 acres of rice in the unit with a production guarantee per acre of 3,750 pounds per acre and your projected price is \$0.0750, your harvest price is \$0.0700, and your production to count is 150,000 pounds.
