WASHINGTON, Oct. 2, 2023 – Today, the U.S. Department of Agriculture (USDA) is announcing a new crop insurance program designed for agricultural producers who use controlled environments in their operations. The new Controlled Environment program from USDA’s Risk Management Agency (RMA) is specifically for plants grown in fully enclosed controlled environments and provides coverage against plant diseases subject to destruction orders. Available beginning in the 2024 crop year, the Controlled Environment program provides a risk management resource for urban, specialty crop, and organic producers who often use controlled environments as a major part of their operations.

“We are always looking to improve and expand the crop insurance resources we offer to agricultural producers, and the new Controlled Environment program will greatly benefit urban, specialty crop, organic and other producers who grow in controlled environments,” said RMA Administrator Marcia Bungler. “Controlled environment agriculture is a quickly growing sector in the Nation’s food production, and this new option is part of USDA’s broader effort to support urban agriculture and new and better markets for American producers.”

The Controlled Environment program is a dollar plan of insurance, which bases the insured’s guarantee on inventory values reported by the producer, and provides coverage against plant diseases when the plants must be destroyed under a federal

or state destruction order.

The Controlled Environment program adds to two other federal insurance products available to nursery and innovative agricultural producers by providing benefits that are not available under the other programs, such as:

- Offer coverage for all Controlled Environment plants, including cuttings, seedlings, and tissue culture.
- Offer crop insurance coverage through a streamlined application and policy renewal process.
- Offer new crop insurance coverage specific to the disease risk to plants in Controlled Environment operations.
- Offer insurance for producer-selected plant categories for Controlled Environment that are not in other nursery insurance program.
- Allow Controlled Environment operations to have single peril Controlled Environment insurance to be purchased as a standalone policy or in conjunction with other nursery insurance.

The first sales closing date is Dec. 1, 2023.

The Controlled Environment program will be available in select counties in Alabama, California, Colorado, Delaware, Florida, Hawaii, Iowa, Kentucky, Maine, Maryland, Michigan, Minnesota, New York, New Jersey, North Carolina, Ohio, Oregon, Pennsylvania, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, and Wisconsin.

More Information

RMA is holding virtual and in-person informational sessions this month. [Learn more](#).

Crop insurance is sold and delivered solely through private crop insurance agents. A list of crop insurance agents is available at all USDA Service Centers and online at the [RMA Agent Locator](#). Learn more about crop insurance and the modern farm safety net at rma.usda.gov or by contacting your [RMA Regional Office](#).

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all

communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
