<u>Crop Insurance Deadline Nears in New York and Pennsylvania for Apple Tree Coverage</u>

News Release | Raleigh, North Carolina | March 15, 2024 View PDF

RALEIGH, N.C., March 15, 2024 — The USDA's Risk Management Agency (RMA) reminds New York and Pennsylvania apple growers that the final date to apply for crop insurance coverage under RMA's apple tree policy for the 2024 crop year is April 15. Current policyholders who wish to make changes to their existing policies also have until April 15 to do so. Apple tree coverage insures the tree, rather than the fruit production.

Federal crop insurance is critical to the farm safety net. It helps producers and owners manage revenue risks and strengthens the rural economy. Coverage for apple trees is available in select counties. Additional information can be found on the Actuarial Information Browser page on the RMA website.

Growers are encouraged to visit their crop insurance agent soon to learn specific details for the 2024 crop year. Crop insurance coverage decisions must be made on or before the sales closing date.

RMA is authorizing additional flexibilities due to coronavirus while continuing to support producers, working through Approved Insurance Providers (AIPs) to deliver services, including processing policies, claims and agreements. RMA staff are working with AIPs and other customers by phone, mail and electronically to continue supporting crop insurance coverage for producers. On farmers.gov, you can find more information on USDA's response and relief for producers and use other tools

and resources.

Crop insurance is sold and delivered solely through private crop insurance agents. A list of crop insurance agents is available at all USDA Service Centers and online at the <u>RMA Agent Locator</u>. Learn more about crop insurance and the modern farm safety net at rma.usda.gov.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
