## **Intro Text**

The Supplemental Coverage Option (SCO) is a county-level crop insurance option that provides additional coverage for a portion of a producer's underlying crop insurance policy deductible. Producers must buy it as an endorsement to either the

Yield Protection, Revenue Protection, or Revenue Protection with the Harvest Price Exclusion policies.

RMA is using yield data reported by insured producers, which allows SCO to be offered in more areas, and allows for more practice-specific insurance coverage to be offered. The federal government pays 65 percent of the premium cost for SCO.
