Subject

Revised RY2026 SRA Appendix IV Review Matrix for Crop and Livestock Income Protection (CLIP)

BACKGROUND:

CLIP offers umbrella protection for commodities insured by two or more Revenue Protection (RP) policies. It allows for higher levels of coverage and may be a more cost-effective option compared to purchasing individual policies at the same coverage level. Starting with the 2026 reinsurance year, CLIP will be available for specific spring crops insured under RP plans in 13 states.

ACTION:

This serves to inform our industry partners of revisions to the SRA Appendix IV Review Matrix to address questions related to CLIP and the requirements for \$200K reviews. The review requirements for CLIP are shown in the review matrix under the category for Stand-Alone Insurance Plans as well as Two or More Insurance Plans.

AIPs are expected to review both the underlying commodity policy and CLIP for the applicable reviews and Inspection Elements listed in the matrix.
